### **DETAILED ACTION**

Claims 1, 4-10, 12, 14, 17 and 19-34 are pending in this application.

#### ***Request for Continued Examination (RCE)***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on December 28, 2007 has been entered.

#### ***Action Summary***

All rejections that are not repeated below are hereby withdrawn.

#### ***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1, 4-10, 12, 14, 17 and 19-34 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. Naphtholbenzein is claimed, however it is believed that it should have been Naphtholbenzene. Correction or clarification is required.

***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5, 7, 12, 14, 19, 21 and 23 are rejected under 35 U.S.C. 102(b) as being anticipated by Tratnyek (US 4,407,960).

Tratnyek discloses in Table II, column 12, indicator systems comprising a substrate (boxboard or paper stock), a visual indicating agent (Michler's hydrol; 4,4'-bis[dimethylamino]benzhydrol, col. 2, lines 41-42), clay-containing substrates (which can represent applicants odor absorbing agent). Column 6, lines 7-9 teach that a solution of the chemical was applied to the substrate and allowed to air dry.

***Response to Arguments***

Applicant have amended claim 1 to list the specific visual indicating agents and that the composition contains an odor absorbing agent. It is the position of the examiner that the prior art reference of Tratnyek continues to read on the claimed invention in spite of the amendment. The examiner looked to the specification to find examples of odor absorbing agents. It was noted in the specification on page 2, lines 22-24 that activated carbon, clay, zeolite, etc. are examples of odor absorbing agents. Looking back at the prior art reference, it is

Art Unit: 1616

also noted that in the indicator systems of Table II, clay-containing substrates are used. It is therefore the position of the examiner that the clay-containing substrates will serve as odor absorbing agents.

### ***Claim Objections***

Claim 20 is objected to because of the following informalities: Claim 20 depends from itself. Appropriate correction is required.

### ***Conclusion***

Claims 1, 4-10, 12, 14, 17 and 19-34 are rejected.

### ***Telephone Inquiries***
